Tomasz Pelczar

Aim Short information for prospect employers.

Experience The third places where I was taking the practice was company Orzeł, where I was administrating the computers, I've touched networking and I've got experiences within the Windows and Linux. Second place was the company PlusSolutions, where I was studying the technologies within the WWW and the third was Parasoft, where I was testing the advanced applications to the web pages and I've got good references. I've got the skills within the operating systems, networking and WWW.

I had written the few object oriented C,C++ and Java projects. The last task I've implemented were the UML documents, which are describing the facts from the reality for the scientific reasons. I've written by SQL the small databases. I know good both C++, Java and SQL structure.

I was creating and developing the special web pages, I've used many times languages like PHP, JavaScript, CSS, XHTML and XML, which I know quite good.

I've written a few articles to the academic paper, which was printed in the local magazine. I've prepared the material to the special book, which is allow me to start the ph.d. studying within computer science. The topic was about the Web 2.0 technologies.

Education 2007-2009 at the end of the postgraduate "Engineering of the software and business tools" UJ (II)

2006-2009 UJ (IF) – the last task within the master degree job.

2000-2005 The BSc : The School of Management and Banking in Cracow

1995-1999 The secondary school in Cracow

Languages English: I have got the advanced certificate TELC. No problems to speak and write, but I have never been to the country where this is the mother tongue, very actually I've been the participant of the Metalinguistic Knowledge and the Accurate Use of English Articles by the University.
German: I have got some experience and many school exams. I've started it 10 years ago.
Spanish: I've passed a few basic exams. I am quite familiar with many words and basic grammar.

Personal Interests

The most important issues are within a little more professional IT, sports and music. I like to be on time with the most important issues and if the time can allow, I like to read and finalize a good book.
