

Project Proposal:

A simple text editor demonstrating collaborative features of Telepathy streams. This collaborative editor should allow two or more people to edit the same plain text document.

whenever one user (say A)is modifying one document another user (say B) should wait to write data into the same document until the first user(A) finishing the writing of that document . This project can prevent that waiting time, and give the facility to modify the same documnt

My Profile::

Name :: P.RAMAKRISHNA

Degree : B.Tech(CSE) from JNTUA COLLEGE OF
ENGINEERING,PULIVENDULA. OF
May-2011.

E-mail : p.ramachrishna@gmail.com
