**Image Preview**

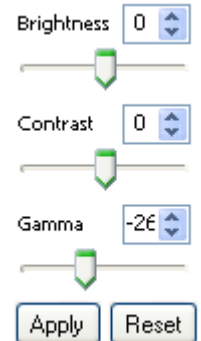

## Edit Image Tab

Crop, resize and clean the photo to 1000 X 800 size approximately.

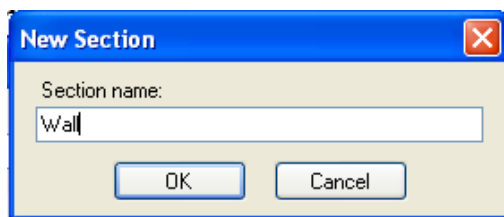

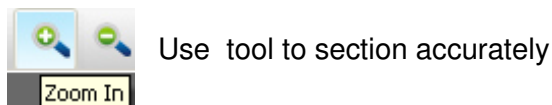

Brightness adjustment using  tool

## Sectioning Tab

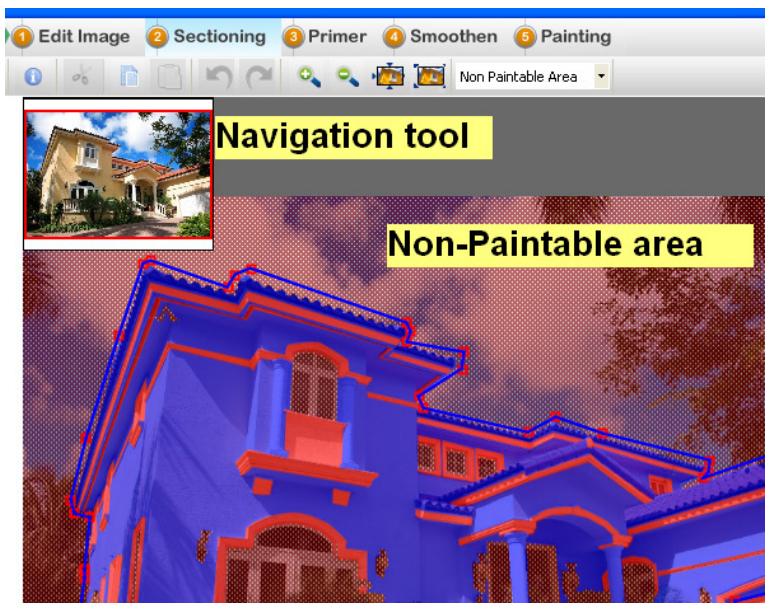

Select the polygon tool  to mask the photo.

First mask the **non paintable area**.

Then mask paintable area using  tool to create paintable sections.

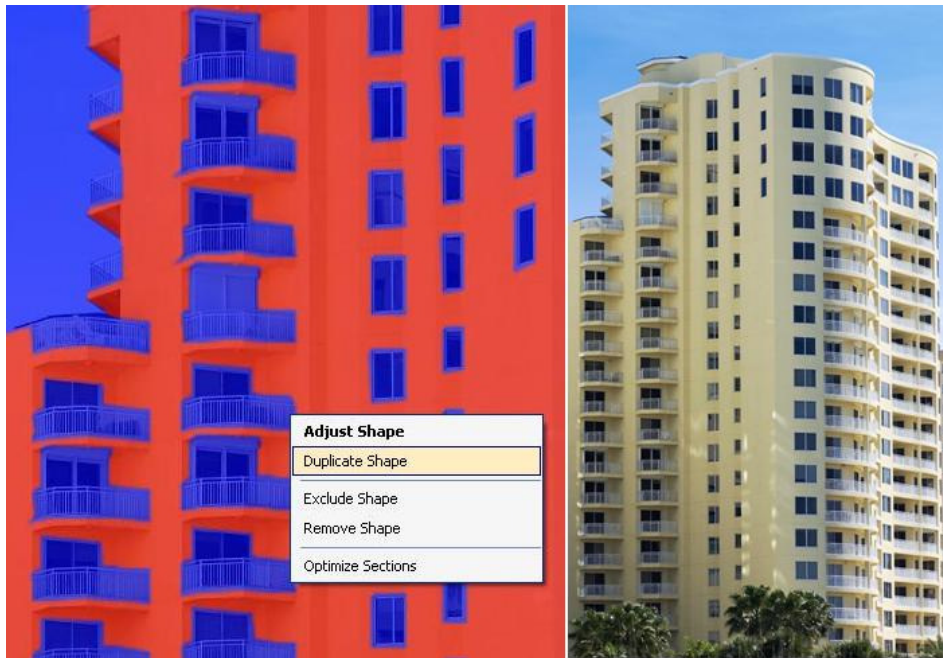

Enter the name of the paintable sections like Walls, borders etc

- Non paintable area will be in **netted red** and paintable area will be in **blue**
- Use Navigation tool to navigate across the photo while sectioning

## Sectioning similar shapes:

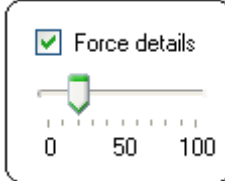

Option to copy paste shapes while sectioning similar shapes

## Primer Tab

● Use  Fine Tuner tool and click on the **darker area**.

● Use Force detail tool 

● Use  Primer tool to apply primer.

● Adjust the “Force detail” level for best surface detail and the primer finish.

## Smoothen Tab

Clean the image using  Clone Stamp tool

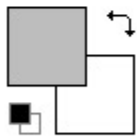

Use “Brush”  tool create a Gradient effect in the interiors.

Use “Brush”  tool create Perspective.

To add perspective to Textures (in Painting Tab), first apply Gradient on specific section in Smoothen Tab

Transparent

Color Variation

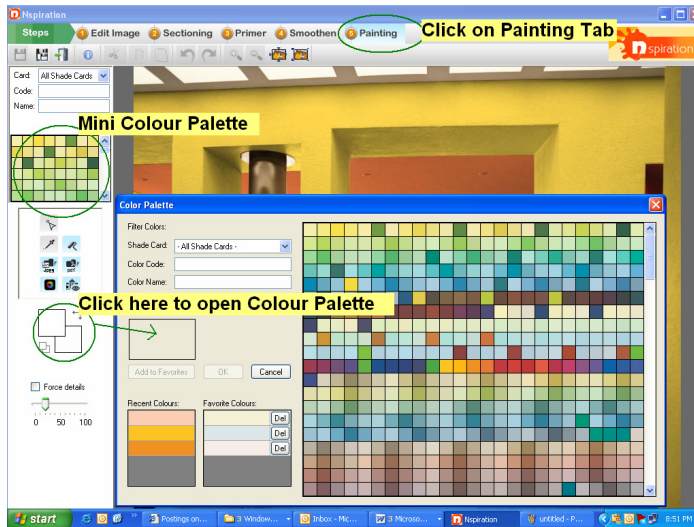

Source Brightness
