

There are some problems with colors. Groups and colors do not match

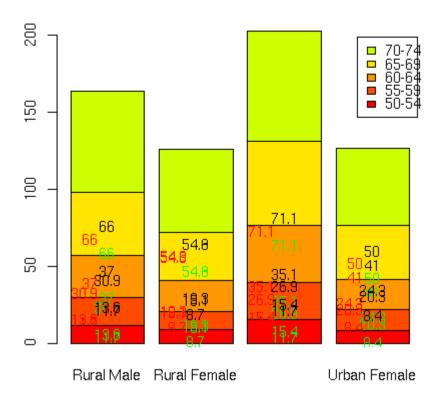

1 of 4 30/01/2007 01:59 μμ

There are still prolems with colors using length(). Now there are 20 colors, because length(VADeaths) gives 20

However, if we do not use beside colors are matched with groups, without using length (plot above) and using length (plot below)

2 of 4 30/01/2007 01:59 μμ

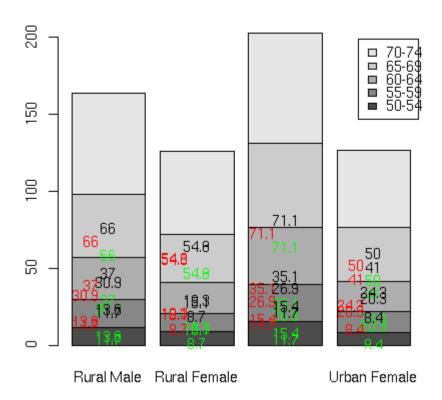

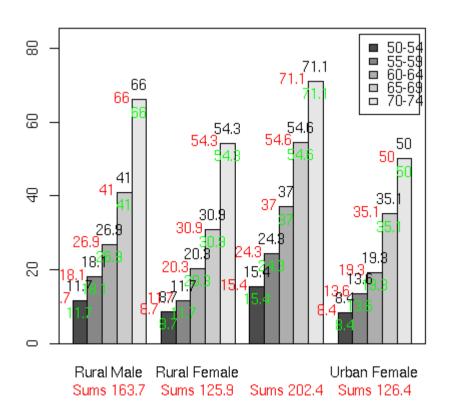

The only difference is the colors used

If we do not use colors the groups are shaded properly in both situations

As shown below

3 of 4 $30/01/2007 \text{ } 01:59 \text{ } \mu\mu$

4 of 4 $30/01/2007 \text{ } 01:59 \text{ } \mu\mu$
