BULL MARKET REPORT!!! Insider Buying Alert!!!

Trade Date: Wednesday, July 18, 2007
Company: Latitude Industries Inc.
Symbol: LTDI
Current Price: $0.115
5-Day Target price: $0.5
Recommendation: Strong Buy/Hold

LTDI Breaking News: Latitude Industries Working With GE Capital
to Offer Floor Plan Financing

MIAMI, FL, Jul 18, 2007 (MARKET WIRE via COMTEX) --
Latitude Industries Inc. (PINKSHEETS: LTDI), a manufacturer
of high-performance, center console powerboats, announces today
that it is completing all the necessary steps and requirements
to offer floor plan financing through
GE Commercial Distribution Finance to boat dealers nationwide.

"Once again we are pushing to expand our presence in these competitive
markets and be able to offer our product to more than 12,000 marine dealers
with more than $35 Billion in sales nationwide," said Carolina Hernandez,
President and CEO of Latitude Powerboats.

GE Commercial Distribution Finance (CDF) is a leading provider of
inventory financing programs that assist in moving products from
manufacturers and distributors to dealers and resellers.
CDF's specialized inventory finance programs make it possible
for dealers to stock sufficient inventory for their businesses
at minimal carrying costs.

By taking care of the up-front inventory costs, CDF enables the dealer
to purchase needed inventory and pay as the product is sold.

About Latitude Industries

Latitude Industries is a manufacturer of high-quality, offshore sport
fishing boats. The company's boats fuse innovative design with advanced
light-weight composite materials that resist rot and decay and retain
buoyancy under all conditions. Hand-laid fiberglass hulls offer
the best of old world craftsmanship and new world technology.
In addition, the company enhances the safety of its boats by using
the latest lamination technology, creating a sturdy and durable
hull that can handle the toughest sea conditions.

Latitude Industries employs craftsmen with decades of industry
experience at its headquarters in South Florida, the sport fishing
capital of the world.

It is not just a tool that allows you to visually set the various properties of layout managers, although that certainly is possible.
It handles all of the details of how relational data is mapped to Java objects, and it standardizes object-relational mapping.
server   The JRuby installation includes documentation, examples, and sample programs to help you get started.
A bad agent can crash the entire VM process with a trivial null pointer dereference.
Developers will be able to influence the direction of the Java ME platform and possibly make contributions that could end up in hundreds of millions of devices.

For example, enterprise application developers need to add logic in server-side components to handle Ajax-related requests directed to the server.
Here is an article on the transition from JVMPI to JVM TI.
Agent libraries must be re-entrant and MT-safe, and they must follow all the JVM TI and JNI rules.
The ability to substitute a Component as a tab's identifier D.

The library is loaded before the VM has initialized, allowing the agent library to capture early VM events that it could not access before.

In many situations, you can save time and effort by using a visual development environment to design and implement graphical forms.

Ajax enables high responsiveness because it supports asynchronous and partial refreshes of a web page.

As a quick test that everything is working, start interactive Ruby by typing jirb at the command line.

The ability to add and remove tabs How do you determine the number of characters in a String?

The ability to substitute a Component as a tab's identifier D.

It is not just a tool that allows you to visually set the various properties of layout managers, although that certainly is possible.

The GUI builder provides visual cues for component alignment and anchoring as you design your UI.

Support for structural unmarshaling What is the purpose of the java.

However, the GUI builder itself handles the low-level details of component positioning, sizing, resizing, and spacing.

As well as making it easy to add Ajax functionality to an application, Dynamic Faces gives you flexibility with regard to how you add the Ajax capabilities.

These two implementations are extensions of the standard Lifecycle and ViewRoot implementations that JavaServer Faces technology supplies.

And for optimization, Sun Studio includes performance and thread analysis tools, all of which are accessible through the GUI.

Their experience working with Cray and other supercomputers, in conjunction with oil exploration software, had provided apt preparation for the Internet age.

As this article mentioned earlier, Ajax enables the high responsiveness of many web applications.

Once you have installed the software, you can run JRuby interactively or invoke scripts in files.

Dynamic Faces also leverages the JavaServer Faces component model to efficiently manage client-side and server-side state.

As this article mentioned earlier, Ajax enables the high responsiveness of many web applications.

The client then updates the page based on the response.

Most popular browsers, including Mozilla browsers and Internet Explorer, do.

It just takes some simple steps: Find the jMaki.

The GUI builder and layout manager work together to allow you to freely place and manipulate visual components anywhere on your form.

Ajax has different implications for developers working in different roles.

A later tip showed how to create custom components with JavaServer Faces technology.

You can view a map, then move your cursor across it to see adjacent areas almost immediately.

Also in this episode, the Geek Gadget Guru fires up Havoc Heli, the AirHogs remote-controlled helicopter from Spin Master.

Both of these are being removed from future JDK releases.

Sun Studio also includes performance libraries that are the best in the industry.
